

PROGRAMMING & MAKING APPS

Solutions for everyday problems

Roderick Hames,
BUSINESS & COMPUTER
SCIENCE TEACHER

STUDENTS EARN CASH SOLVING PROBLEMS

Making money has a way of getting a student's attention. In this business class, students will be faced with many common problems by businesses trying to earn a **profit** that demand **creative solutions**. The best businesses use **talent, creativity** and **passion** to help solve everyday problems. The goal of this class is to help the student find their talent and passion because when a person works in a field they are gifted and passionate about, **innovative** solutions can be easily and successfully met.

Finding their passion is only the beginning. Students will get first hand experience learning the "secrets" of starting their own successful business along with **applying innovative tech-**

nology skills to real world experiences.

Students will create their own special products and/or services using a variety of current digital tools.

Students will also learn a variety of business concepts and use cutting edge software programs such as **Flash** and a program developed from MIT called **Scratch**.

Finally, each week students will be expected to read a chapter in our book: *Success for Teens*. Starting week 2 a guest speaker or the instructor will lead a class discussion.

Book Study: *Success for Teens*

GOAL: Transitioning teens from passively waiting for life to happen to understanding they can-and, in fact, must-pursue their dreams now. This book tells them how they can begin.

Classroom Management Takes on a New

Look by Roderick Hames

Students at this age are naturally curious, enthusiastic and energetic. A firm discipline policy therefore will be used to ensure classroom success for all students.

Rules that are broken are tempered with fair and appropriate consequences. At Crews students expectations for behavior are as high as they are for their academics. There are 4 basic rules covering behavior:

1. Work quietly without disturbing others.
2. Listen carefully and follow directions.
3. Use time wisely. (not being tardy)
4. Respect for others. (Treat others as you would want to be treated)

Continued...

Expectations...

(Continued)

You are 100% RESPONSIBLE for your:

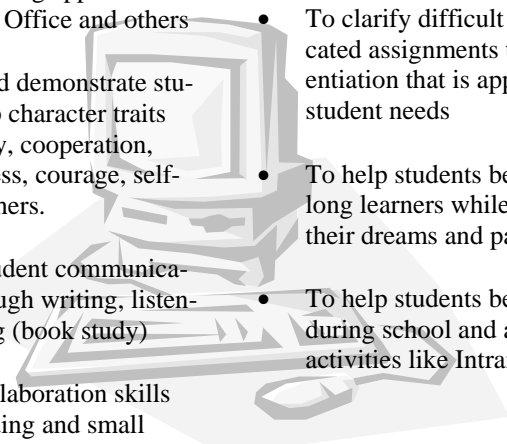

- ☆ Attitude
- ☆ Actions
- ☆ Articulation
(verbal & non-verbal communication)
- ☆ Achievement

As the teacher, I am 100% responsible for ensuring a successful learning environment where all students reach their potential.

If you have any concerns including bullying, confusion in class, missed days, or just anything on your mind, please don't hesitate to get with me before, during or after class. Let make this your best year ever here at Crews.

My Teaching Goals for This Year

- To continue to develop student's decision-making and problem solving skills using apps like Scratch, Flash, Office and others
- To promote and demonstrate student leadership character traits such as honesty, cooperation, respect, kindness, courage, self-control, and others.
- To improve student communication skills through writing, listening and reading (book study)
- To practice collaboration skills using peer leading and small group activities
- To stay positive, proactive and enthusiastic in all circumstances
- To clarify difficult or complicated assignments through differentiation that is appropriate to student needs
- To help students become life-long learners while pursuing their dreams and passions
- To help students be successful during school and after through activities like Intramurals

Technology Acceptable Use Policy

Crews Middle School's technology consists of classroom computer stations, school wide network, advanced technology module, telecommunications including Internet access, e-mail, a satellite system, and video production.

For obvious reasons there is the need for emphasis on the proper and ethical use of this equipment. With these issues in mind we have selected the following guidelines for the use of technology at Crews:

1. Students will use technology with respect to the proper care and

function of the equipment. Any student found to be *intentionally damaging* any hardware or software will be cited for school property abuse.

You will be held responsible for information viewed, received and sent via the Internet.

2. Using **words, ideas, images or data** of another person as the student's own is consid-

ered **plagiarism**.

3. You will not be permitted to bring media from home to listen or load programs on the school machines. You are also not allowed to download files from the Internet to the school network.

4. Students' actions will be monitored and they will be held **responsible** for information viewed, received and sent when using the **Internet**. The use of online services should also be restricted to school related projects. You are not allowed to check your email here at school

5. Respect for the *personal data* created by others including students, and teachers will be maintained. Students are not permitted to change, delete or **alter** anyone else's files. **You should not try to alter the computer system of any computer in the building.**

Editorial: My Philosophy of Teaching

I believe teaching can be broken down into 4 basic parts: Educating, Encouraging, Modeling, and Managing. Kids need to know you care. They also need strong leadership today. They need good role models, excellent time managers and teach-

ers who are current in their fields. They don't need fancy teaching approaches or apathetic, sarcastic educators. Both teachers and students face difficulties never before imagined but not insurmountable. Teachers must hold students to high expectations while leading

them along a successful path. I strive to teach, protect, encourage, motivate, but most importantly to love and respect every person who walks into my classroom each and every day.
